

KYNEKT™

**A New Standard for
Protecting What You Own.**

**A Smarter Way to Track, Protect,
and Prove What's Yours.**

The Problem the Industry Has Lived With for Too Long.

Across construction and the trades, tools, plant, and machinery go missing every day.

Not just through theft – but through poor visibility, weak records, misuse, and systems that were never built for the realities of site life.

When something disappears, the consequences are immediate:

- Work stops
- Stress increases
- Insurance claims drag on
- Proof of ownership becomes a scramble

Even when stolen equipment is recovered, it often can't be returned – simply because ownership can't be confirmed.

This is where the system has been broken.

The **KYNEKT.ID** Solution

KYNEKT.ID was built to
change the system.

It connects:

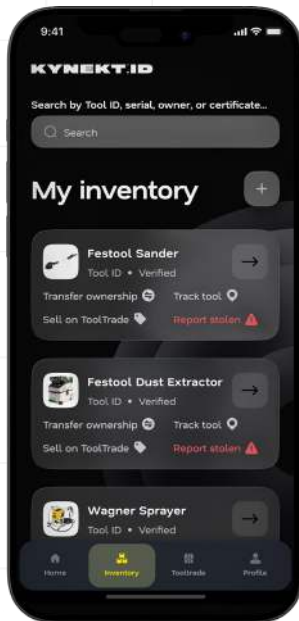

- A complete digital inventory
- Real-time tracking and remote control
- A verified marketplace for buying and selling tools
- An active industry network that shares intelligence

All in one platform, designed specifically for trades and construction businesses that own their equipment and depend on it to earn a living.

**This isn't about more admin.
It's about control, accountability,
and protection – at an industry level.**

Know What You Own. Prove It When It Matters.

K | INVENTORY

The Foundation of Control.

You can't protect what you can't clearly account for.

KYNEKT | INVENTORY gives you a single, secure digital record of every tool, machine, and asset you own – accessible anytime, anywhere.

You always know:

- What you own
- Where it belongs
- Who it belongs to

This creates a permanent, verifiable link between you and your equipment.

Recoverable, not just recorded.

If registered equipment is recovered by police or authorities, **K | INVENTORY** allows it to be traced directly back to you.

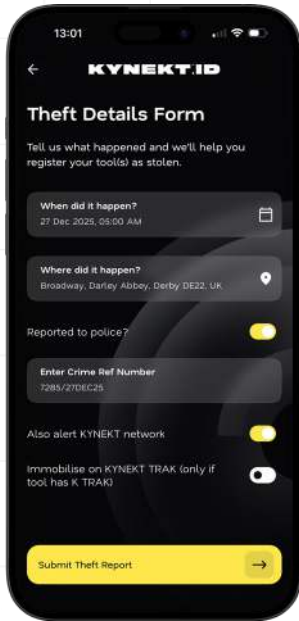

Ownership is clear.

Records are immediate.

Recovery becomes possible – not guesswork.

**This turns your inventory into more than a list.
It becomes proof that follows the asset.**

Report Theft and Share Alerts with the Community.

K | INVENTORY

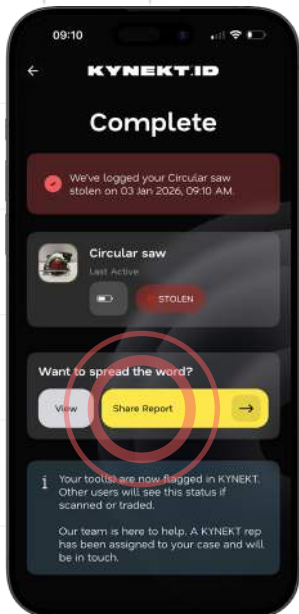

When Theft Happens – You’re Ready

If equipment is stolen, **KYNEKT | INVENTORY** allows you to:

- Instantly generate a stolen equipment report
- Attach a crime reference number
- Export everything directly to your insurance company

No searching for old receipts.
No weeks lost rebuilding proof of ownership.
What once took weeks can now take minutes.

Industry alerts that keep you one step ahead.

When theft occurs nearby, **KYNEKT.ID** can notify users in the surrounding area through the app – helping the wider trade community stay alert and keep an eye out.

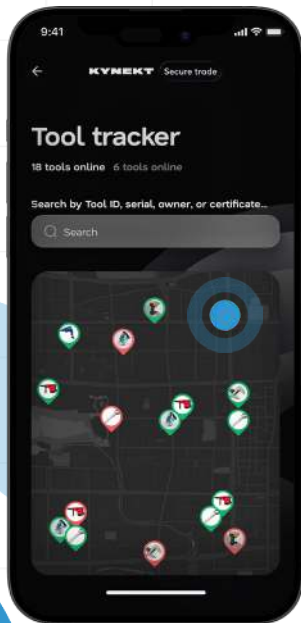

It's not just individual protection. It's shared awareness across the industry.

Why This Matters

Insurance delays don't come from theft – they come from missing information.

K | INVENTORY removes that risk before it exists – and improves the chances of recovery when the worst happens.

Monitor, Live Track & Disable Your Equipment.

K | TRAK™

Stay in Control – Even When Equipment Leaves Site.

Ownership Shouldn't End at the Gate. When tools or machinery leave site, most systems lose visibility – and control. **KYNEKT | TRAK** ensures you don't.

Real-Time Location. Real Authority.

With **K | TRAK**, you can:

- See the real-time location of your equipment
- Monitor movement and activity
- Remotely disable tools or machines so they no longer work

If something is stolen, it can't simply be used, moved, or passed on without consequence.

Act Immediately – Not After the Damage

If equipment goes missing:

- You know where it is
- You know what's happening
- You can take action instantly

No waiting. No panic. No loss of control.

This is protection that works when you need it most.

Buy & Sell Used, Verified Tools on Our Marketplace.

KYNEKT™

The marketplace for trusted tools

A Marketplace Built for Trades.

KYNEKT | TOOLTRADE is a verified marketplace designed specifically for the construction industry.

Buy Smarter. Sell Faster. Keep Tools Working for You.

Tools Should Earn Their Place. Every business has equipment sitting idle – unused tools, surplus machines, assets that no longer fit the job.

It allows you to:

- Sell unused tools for real money
- Buy trusted second-hand equipment
- Purchase new tools from approved vendors

No car boot sales.

No risky meet-ups.

No wasted weekends.

The **KYNEKT**™ Standard.

KYNEKT.ID brings everything together:

- A complete digital inventory that proves ownership
- Real-time tracking and control when equipment moves
- Industry alerts that increase awareness and recovery
- A smarter way to buy and sell tools

All connected.
All purpose-built.
All designed for the construction industry.

This is how modern trades protect their livelihood – individually and collectively.
